

LOGO

LAP-TEQ PORT

It allows to quickly see at first view, which units are compatible with each other.

TEQSAS

LAP-TEQ PORT TECHNOLOGY

COMPATIBILITY OF THE LAP-TEQ FAMILY

As more TEQSAS products will be added in the future we thought about how to best show the compatibility of the TEQSAS products. We have come to the conclusion that a kind of icon is the most useful for this purpose and so we have created the LAP-TEQ PORT Icon. The LAP-TEQ PORT is a technology to be able to read out LAP-TEQ sensors.

This means that the LAP-TEQ PORT icon will be present on all illustrations of the readout units (LAP-TEQ PLUS DISPLAY, LAP-TEQ MOTION and LAP-TEQ WEB-DISPLAY). The logo LAP-TEQ PORT COMPATIBLE will be presented on all illustrations of the measurement units (LAP-TEQ PLUS SENSOR, LAP-TEQ ELEVATION, LAP-TEQ THS).
